Artificial intelligence
A threat or a possibility?

28SEP2023

hannu.viitala@savonia.fi

Should the use of artificial intelligence in teaching be prohibited or allowed?

How can the use of artificial intelligence be prevented?

More control?

Threat

What happens when artificial intelligence gains consciousness?

The student prepares a report using artificial intelligence

➢The teacher gives feedback on the report using artificial intelligence

➢No more learning?

➢A lot of useless work

➢teaching must be planned in a new way

Possibility

- Artificial intelligence is a tireless conversational partner

- Understanding the whole of the matter

- Avoiding blank page syndrome

- And more...

➢Teaching must be planned in a new way

Try ChatGPT

- Is the answer reasonable and usable?

- What questions can't ChatGPT answer?

https://openai.com/

Try Bard

- Search for a specific thing in a pdf document
